You can use your username **or** your email address to sign in. If you enable [**Remember Password**]

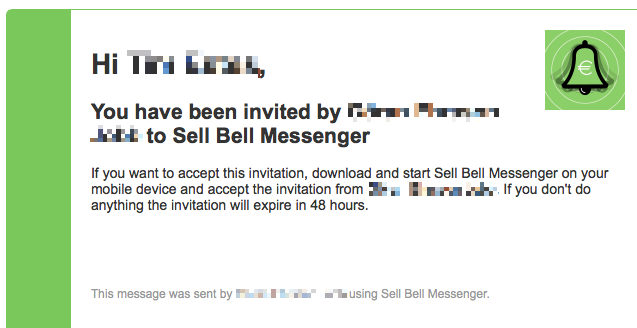

you don't have to enter username and password next time you start Sell Bell.

Recipients / Subscribers

Sell Bell send messages to a pre-defined group of people. This group is called **recipients** in Sell Bell. You can create your own list of recipients, or you can be part of some other user's group. The group owner can optionally give you permission to send messages to the group.

To create your own group of recipients tap [**Recipients/Subscribers**] and then [**New Recipient**] (Android) [+] (iOS). Tap the search field and enter the username of the person you want to include in the list.

An invitation email will be sent to the user.

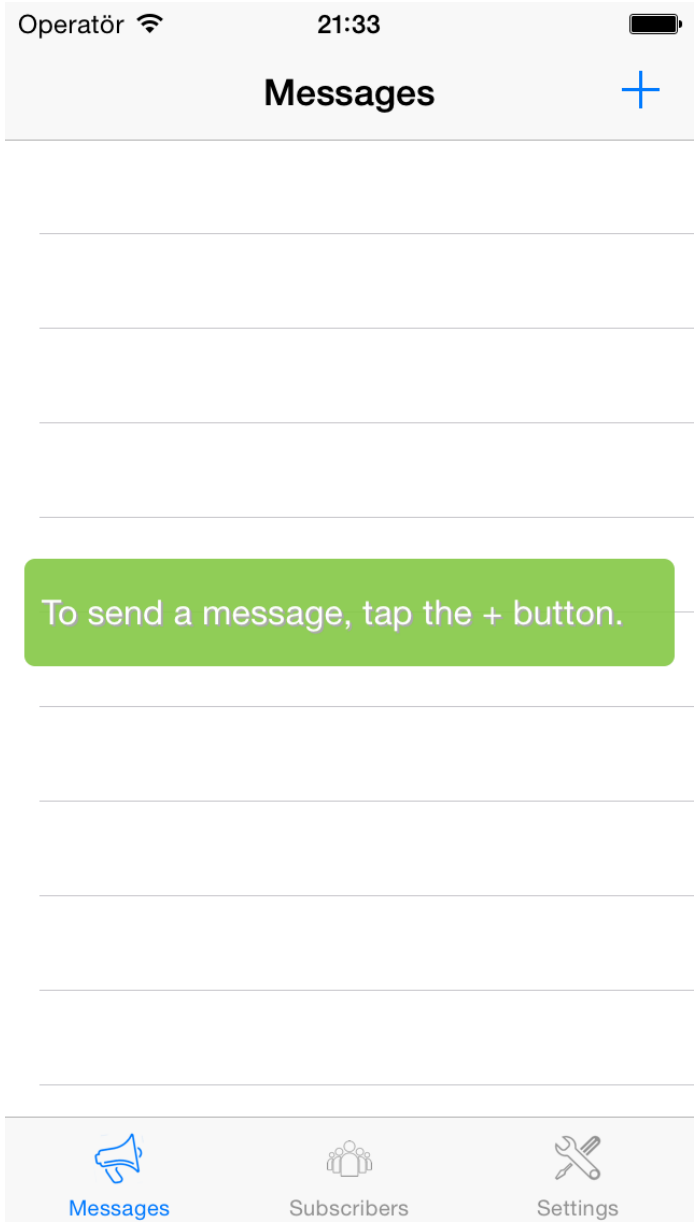

The person you invited must start Sell Bell on it's mobile device and accept the invitation. When the invitation has been accepted, all messages you send will be received by that user.

NOTE

In Sell Bell version 1.0.0 on iOS recipients was called **subscribers**. This was changed to **recipients** in iOS version 1.0.1. The Android version of Sell Bell uses **recipients** everywhere.

Messages

When you login to Sell Bell you see a list of recent messages that was sent to you.

To send a message, tap **[New Message]** (Android) **[+]** (iOS). A list if available templates is show and you select a template by tapping it's name.

If you don't see any templates you can create a template by tapping **[New Template]** (Android) **[+]** (iOS). Or you can be invited by someone that already have templates.
